To Whom It May Concern:

It is with much enthusiasm that I recommend Cristian Daniel Herrera for inclusion in any of the work programs about technology and software development that you have.

I was Cristian's instructor and technical leader for multiple development projects during his two years at The Bit Cooperative Ltda.

His coding and research skills are truly phenomenal – for his last project he made a whole full e-commerce solution using the MERN stack
Cristian's wide-ranging intellect is such that he would be bored by most simple project and possesses the self-motivation to successfully create and execute an independent project on his own

Cristian's development strengths are complemented by his demonstrated leadership skills.

Please let me know if I can provide any more information to strengthen Cristian's work ethic and knowledgment.

He has a very special spark, and I trust he will go far in making our world a better place.

Sincerely,

Juan Pablo Romano.
